

COMMUNITY REPORT

2020 & 2021 Community Report

The Covid-19 pandemic truly disadvantaged our hotel, like many around the world. However, when we were faced with travel restrictions, Covid lockdowns and the fact that the island of Barbados had not seen the number of tourists for over 20+ months, we were able to give back to our community in Barbados by being one of the few hotels that opened their doors to the Government of Barbados, by providing accommodation to fight the spread of Covid.

Time Out Hotel from March 2020 until August 2020, was closed, however in August we opened our doors to facilitate the Ministry of Health in Barbados, by providing rooms for quarantining persons who were contract traced. We continued to support the government with this program throughout 2020 and into 2021. Time Out Hotel was also able to keep the majority of their team employed, which we are so happy we were able to do!

These two years were certainly difficult, and our operations changed dramatically to accommodate this pandemic, however we are happy that we were able to keep our property running, our team employed and we were in a position to assist our Government when they needed us most!

A handwritten signature in black ink, appearing to read "A. Farmer".
